## 1. Schematic diagram of the optical path

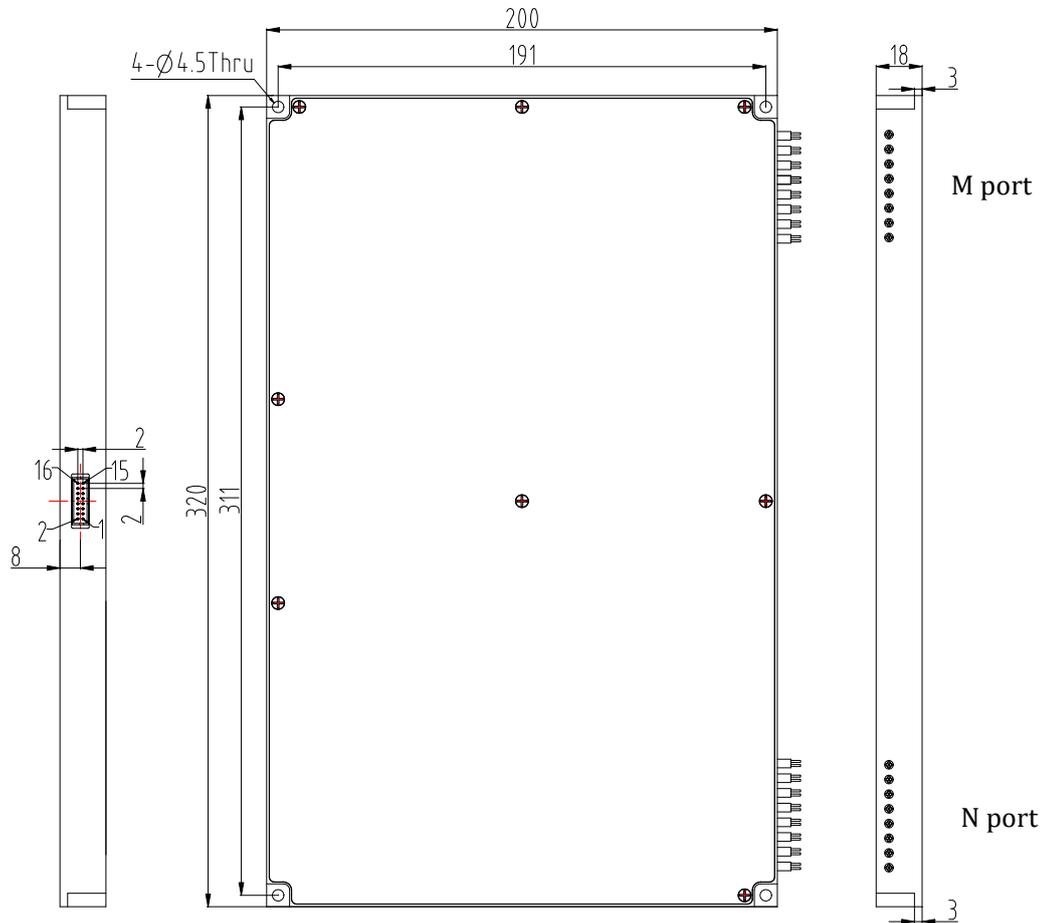

## 2. Performance indicators

| Model number             | HC-MEMS 24X12 |
|--------------------------|---------------|
| Operating wavelength     | 1310/1550nm   |
| Insertion loss           | ≤3.0dB        |
| Return loss              | ≥45dB         |
| crosstalk                | ≥50dB         |
| Switch time              | ≤30ms         |
| Transmit optical power   | ≤23dBm        |
| Fiber type               | SM-9/125      |
| Optical type             | LC/PC         |
| Fiber length             | 0.6m          |
| Control interface        | UART          |
| Operating voltage        | DC5V          |
| Module power consumption | ≤10W          |
| Operating temperature    | -5℃ ~ +60℃    |
| Storage temperature      | -40℃ ~ +85℃   |
| Module size              | 320X200X18mm  |

### 3. Size diagram

### 4. Pin definition

| Pin number | Pin definition | Signal direction, type | Function description                                     |
|------------|----------------|------------------------|--|
| 1          | NC             |                        | dangling   |
| 2          | NC             |                        | dangling   |
| 3          | VCC            | Power                  | Power supply, DC 5V, 2A                                  |
| 4          | VCC            | Power                  | Power supply, DC 5V, 2A                                  |
| 5          | GND            | Power                  | GND  |
| 6          | GND            | Power                  | GND  |
| 7          | NC             |                        | dangling   |
| 8          | NC             |                        | dangling   |
| 9          | TXD            | Output                 | Serial port data transmitter (LVTTTL level serial port). |
| 10         | RXD            | Input                  | Serial data receiving terminal                           |

|    |    |  |                             |
|----|----|--|-----------------------------|
|    |    |  | (LVTTTL level serial port). |
| 11 | NC |  | dangling                    |
| 12 | NC |  | dangling                    |
| 13 | NC |  | dangling                    |
| 14 | NC |  | dangling                    |
| 15 | NC |  | dangling                    |
| 16 | NC |  | dangling                    |

Note: The module electrical interface uses MOMOLEX's 87833-1620 and the customer connector is recommended to use MOMOLEX's 87568-1694.

## 5. Description of programmatic instructions

This device can receive control signals from the computer through the UART interface to achieve automatic measurement or real-time monitoring.

- (1) This instrument can only execute one instruction at a time. Usually, the program returns the corresponding value before entering the next instruction.
- (2) Please use capital letters.
- (3) In actual operation, enter the sharp bracket "<" as the start character and the sharp bracket ">" as the ending.
- (4) Instruction error returns <ER>.

### Program-controlled instruction set

| command   | description  | example  |
|---|--|--|
| <OSW_SW_a_b_c_d_e_f_g_h_i_j_k_l><br>(a、b、c、d、e、f、g、h、i、j、k、l values 01~24 , and the values cannot be the same!) | <b>Channel switching</b><br>Send:<br><OSW_SW_N1 corresponding M channel_N2 corresponding M channel_N3 corresponding M channel_N4 corresponding M channel_N5 corresponding M channel_N6 corresponding M channel_N7 corresponding M channel_N8 corresponding M channel_N9 corresponding M channel_N10 corresponding M channel_N11 corresponding M channel_N12 corresponding M channel> | Send:<br><OSW_SW_01_02_03_04_05_06_07_08_09_10_11_12><br>Return:<br><OSW_SW_01_02_03_04_05_06_07_08_09_10_11_12_OK><br>It means that the 24X12 optical path is set to:<br>M1→N1、M2→N2、M3→N3、M4→N4、M5→N5、M6→N6、M7→N7、M8→N8、M9→N9、M10→N10、M11→N11、M12→N12; |
| <OSW_A_?>   | <b>Query the channel status</b><br>Return:<br><OSW_A_N1 corresponding M channel_N2 corresponding M channel_N3 corresponding M channel_N4 corresponding M   | Return:<br><OSW_A_01_02_03_04_05_06_07_08_09_10_11_12><br>The current optical path is:<br>M1→N1、M2→N2、M3→N3、M4→N4、M5→N5、M6→N6、M7→N7、M8→N8、   |

|              |   |  |
|--------------|---|--|
